# LAZY MESSENGER BOT:

## 1. Control YouTube using fb Messenger

Control YouTube just by texting bot integrated with **Facebook Messenger** using key terms like:

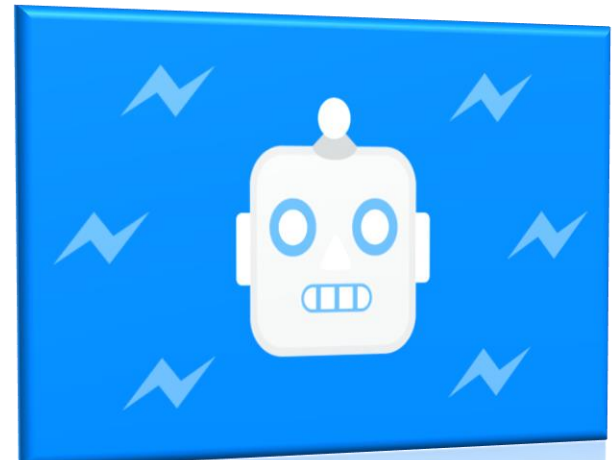

- play <song-name>
- seek-to <time-in-seconds>
- pause
- resume
- mute
- unmute and many more.

## 2. Real Time News Updates From T.O.I. Using Messenger:

Activates the BOT just by texting the bot key terms like :

- show headlines
- <topic> updates.

**For automation we are using Selenium- A Python API to access all functionalities of the system WebDriver in an intuitive way.**

**For news functionality we are using beautiful soup library to scrap TOI news headlines Data .**

**To automate the above tasks we are using selenium chrome drivers to interact our system with the fb messenger by parsing each command to make two way communication**
